# Scores Tab

When you click on the 'Scores' tab, you will first be prompted if you want to start the Tournament Timer.

All players that need a score for a round have an asterisk preceding their name. As you enter player scores, the player name is removed from the drop-list. This is to speed up the data entry process. If you want to see all of the players, just check the "Show All" checkbox.

**TIP: Enter the bumps, woodpeckers and Lone data before you enter the score data. As soon as the score is entered, the player name drops off the player list, if the "Show All" checkbox is not checked.**

**Scores:** When you enter the score for a player, his/her partner will receive the same score. This is also a time saver.

**Bumps and Woodpeckers Lones:** These are cumulative, they do not need to be entered after each game. You should, however enter the values every 5 or more games. When you desire to enter these values, be sure to enter them BEFORE you enter the score, because as soon as you enter the score, the Player combo advances to the next player.

If you want to see a players partner, just click the “Show Partner” button. Notice that the text on the button changes to “Show Opponents”. Click the button again and you will see the opponents of the currently selected player.

**Select Round:** This allows you to go any previous round to check/change scores.

**Show/Hide Partner:** This will allow you to see More/Less player data

**Show/Hide Opponent:** This will allow you to see More/Less player data

**Scores Needed:** This indicates how many players on the current round that needs their scores entered.

**Show All:** This will show all players for the round, both those that need their score entered and those who have entered their score entered.

**Auto-Add Partner Score:** When checked, this will save you time. As you enter a players score, that score is ‘auto’ added to the partner.

**Paid:** At the end of the tournament, if you want to indicate who have ‘paid’ for their bumps and woodys.

# Bumps/Woodpeckers/Lones

Bumps/Woodpeckers/Lones are cumulative. They don't need to be entered after each game, but should be entered before the end of the tournament.

Once all of the scores have been entered for a round, you will be prompted. Press OK and it will automatically advance to the next round.

The screenshot shows the 'Turkey Fest Euchre Tournament' software interface. At the top, it displays 'Bump Jackpot \$0.00', 'Time: 12:14', 'Total Players: 26', 'Current Round: 2', and 'Total Rounds: 24'. A 'Score Sheet Code' of '0130-103205' and 'Est. Finish: 12:00' is also visible. The interface includes a menu bar with options like 'Load', 'Payout', 'Alias', 'Roster', 'Leaders', 'Scores', 'Results', 'Details', 'Timer', 'Lotto', and 'Settings'. A 'Hide Opponents' button and a 'Select Round: 01' dropdown are present. A green 'Auto-Add Partner Score' checkbox is checked. The main area contains input fields for 'Player Round Score', 'Partner Round Score', and 'Opponent Round Score', each with a 'Name' field and a 'Score' field. To the right of these fields are 'Cumulative Values' columns for 'Bumps', 'Woods', and 'Lones', and a 'Score' column. Further right are 'Owe' columns with a 'Paid' checkbox. A yellow dialog box with the text 'THE ROUND IS OVER' and 'All scores have been entered' is centered on the screen, with an 'OK' button at the bottom. At the bottom of the interface, there is a link to 'www.EuchrePad.com' and a yellow 'Update Dual Monitor' button.

# End of Tournament

After you enter the last scores for the last round, you will be prompted that the tournament is over and to click on the Results. Tab.

The screenshot displays the 'Turkey Eve Euchre Tourney' software interface. At the top, it shows 'Bump Jackpot \$17.25', 'Total Players: 24', 'Current Round: 23', and 'Total Rounds: 23'. A 'Score Sheet Code' of '1106-202904' and 'Est. Finish: 7:24' are also visible. The interface includes a navigation bar with tabs for 'Load', 'Payout', 'Alias', 'Roster', 'Leaders', 'Scores', 'Results', 'Details', 'Timer', 'Lotto', and 'Settings'. A 'Hide Opponents' button and a 'Select Round: 23' dropdown are present. The main area is divided into sections for 'Player Round Score', 'Partner Round Score', and 'Opponent Round Score', each with input fields for names and scores, and a 'Cumulative Values' section with dropdowns for 'Bumps', 'Woods', and 'Lones', and a 'Score' field. A 'Paid' checkbox is also visible. A yellow dialog box with the text 'THE TOURNAMENT IS OVER' and 'All scores have been entered. # Lotto

On this tab you 'draw' cards. Players can see these cards at the bottom of the Dual Monitor. On the Results Tab, there is a Lotto Sub-Tab. You can see how all of the Players Rank. The person with the highest hand gets a prize. We usually take \$5.00 or \$10.00 out of the bump money.

The screenshot displays the 'Turkey Fest Euchre Tournament' software interface. At the top, it shows the tournament title and a 'Bump Jackpot' of \$5.50. The current round is 3 of 24 total rounds, with 26 total players. A 'Score Sheet Code' of 0130-103205 is also visible. The interface includes a navigation menu with options like 'Load', 'Payout', 'Alias', 'Roster', 'Leaders', 'Scores', 'Results', 'Details', 'Timer', 'Lotto', and 'Settings'. The 'Lotto' tab is active, showing a 'Draw Card' button, a checkbox for 'Make first card Joker' (which is checked), and a 'Reset' button. The cards drawn are: a Joker, 6 of diamonds, 5 of spades, 9 of hearts, and 6 of hearts. Below these are eight red patterned cards representing the remaining deck. At the bottom, there is a link to 'www.EuchrePad.com' and a yellow 'Update Dual Monitor' button.

# Dual Monitor

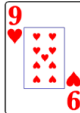

If you want to use a second monitor, then you will be able to display important leader details. This works best if Leaderboard is running on a Laptop and you connect a second monitor into the monitor port on the Laptop. Then you need to extend your monitor to the second monitor. Activate the second monitor by pressing the “Dual Monitor” button at the bottom-right of Leaderboard. The Dual monitor is only updated when a round is completed and all of the scores for the round have been entered. You can force a refresh by simply pressing the ‘Dual Monitor’ button.
